EDUCATION

Srinivas Institute of Technology

B.E. in Computer Science Engineering

Mangalore, Karnataka

Sep. 2022 – Present

KOODALI HSS

+2 Science-Biology

Kannur, Kerala

2020 – 2022

PROJECTS

Student AI Hub | *React, Node.js, PostgreSQL, Tailwind CSS, Gemini API, Ollama*

Present

- Architected a full-stack PERN (PostgreSQL, Express, React, Node.js) application to serve as a centralized hub for AI-powered student tools.
- Developing robust RESTful APIs with Node.js/Express.js to manage user data, requests, and serve multiple AI services.
- Integrated both cloud-based APIs (Gemini, Llama 3.1) and locally-run models (via Ollama) to power features like a video summarizer and resume analyzer.

E-commerce Frontend | *React, Tailwind CSS, Context API*

Present

- Building a scalable, component-based e-commerce frontend with a modern UI using React and Tailwind CSS.
- Implementing key features including dynamic product listing pages, detailed product views, and a fully functional shopping cart.
- Leveraging React's Context API for efficient global state management of the shopping cart and user session data.

Fit and Track | *Node, Express, PostgreSQL, EJS, Openrouter API*

June 2025

- Engineered a full-stack web app with a Node.js/Express backend and EJS frontend for responsive fitness tracking, including a calorie/protein dashboard.
- Implemented user authentication and data persistence using PostgreSQL to store user logs and profile information.
- Integrated the Openrouter API to create an AI fitness chatbot, providing users with personalized workout and diet suggestions based on their queries.

TECHNICAL SKILLS

Languages: C, Python, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, Tailwind CSS, Bootstrap, EJS

Backend: Node.js, Express.js, RESTful APIs

Databases: PostgreSQL

Developer Tools: Git, GitHub, Postman, VS Code, Ollama, LM Studio

Core Concepts: API Integration, Full-Stack Development, State Management (Context API), Local AI Model Integration

SUMMARY

Proactive Computer Science student seeking a challenging internship in Backend (Node.js) or Frontend (React) Development.

Proven ability to build, test, and deploy full-stack PERN (PostgreSQL, Express, React, Node.js) applications from concept to completion.

Experienced in developing RESTful APIs, managing application state, and integrating third-party AI models (Gemini, Llama 3.1).

CERTIFICATIONS

The Complete 2024 Web Development Bootcamp

Udemy (Dr. Angela Yu)

2025

- Completed a 62-hour comprehensive training course on full-stack web development, covering HTML, CSS, JavaScript, Node.js, React, PostgreSQL, and Web3 concepts.
